WHAT IS CLAIMED IS:

1. An isolated bacterium comprising: an F' episome that confers high efficiency transformability; one or more mutations that allow transformation of methylated nucleic acids; one or mutations that allow transformation with unmethylated nucleic acids; and one or more mutations that confer resistance to bacteriophage infection.
2. The bacterium of claim 1 wherein said bacterium is an *Escherichia coli* strain.
3. The bacterium of claim 2 wherein said strain is K-12.
4. The bacterium of claim 3 wherein the genotype of said F' episome comprises *proAB*⁺ *lacI*^q *lacZ*ΔM15 *Tn10*(Tet^R).
5. The bacterium of claim 3 wherein said one or more mutations that allow transformation of unmethylated nucleic acids involve the *hsdR*, *hsdM* and/or *hsdS* genes.
6. The bacterium of claim 3 wherein said one or more mutations that allow transformation of methylated nucleic acids involve the *mcrA*, *mcrBC* and/or *mrr* genes.
7. The bacterium of claim 3 wherein said bacteriophage is phage T1.
8. The bacterium of claim 3 wherein said one or more mutations that confer resistance to bacteriophage infection involve the *tonA* gene.

9. An isolated *Escherichia coli* K-12 bacterium, said bacterium having a genotype comprising *mcrA* $\Delta(mrr-hsdRMS-mcrBC)$ *tonA* / F' *proAB*⁺ *lacI*^q *lacZ* Δ M15 *Tn10*(Tet^R).
10. The bacterium of claim 9, wherein said genotype comprises: *mcrA* $\Delta(mrr-hsdRMS-mcrBC)$ $\phi 80(lacZ)\Delta$ M15 $\Delta(lacZYA-argF)$ U169 *endA1* *recA1* *supE44* *thi-1* *gyrA96* *relA1* *deoR* *tonA* *panD* / F' *proAB*⁺ *lacI*^q *lacZ* Δ M15 *Tn10*(Tet^R).
11. The bacterium of claim 9, wherein said bacterium is *Escherichia coli* BRL3946 (NRRL accession No. B-30640).
12. The bacterium of claim 9, wherein said bacterium is a derivative of *Escherichia coli* BRL3946 (NRRL accession No. B-30640).
